

AccountingPod for QuickBooks Online engages students with three case studies in an active learning experience as they practice fundamental accounting skills inside professional software. Guided instruction helps students navigate and develop skills inside QuickBooks Online. Because QuickBooks Online is a cloud-based accounting software, the platform may change at any time. AccountingPod continuously updates module tasks and instruction to keep streamline instruction as the software updates. With each update, we have ensured that the tasks students complete meet all the skills required on the Intuit QuickBooks Online Certified User exam
